PostgreSQL

Profile

I am a software engineer who has a strong work ethic and is self driven. I have a background as a service technician in the construction industry which has given me the skills to understand the importance of delivering a high quality product while also delivering exceptional customer service.

Professional Experience

Service Technician

Lotus Doors | Nov 2019 - July 2020

- Service and maintain commercial and residential products
- Schedule appointments with builders and customers .
- Identify problems and rectify or order needed parts to complete the works.

Software Engineering Projects

Bookfix

A book review site designed to spark interest in various books bases on what other users have uploaded.

- Using Ruby On Rails to create a back-end server via Ajax
- Used bootstrap and simply form in for design.
- [Link to project](#)

Jump Man

A 2D platformer game inspired by Mario Map Marker.

- Created using Phaser 3 and various pixel art
- [Link to game](#)

Workout App

Users can create and share workouts .

- Used React as a front end
- Used Ruby On Rails as a back end
- A current work in progress
- Interval and tempo timers coming soon
- [Link to project](#)
